## Experience

### Sidekick, LLC

Co-Founder | Front-End Developer | UI/UX | Project Manager

October 2018 - Present

- > Utilize the appropriate languages, tools, and frameworks to develop solutions based on client needs and constraints
- > Suggest product enhancements based on performance analysis and evolving client needs
- > Collaborate with co-founder and external developers as needed to concept, build, test, launch, and maintain simultaneous ongoing projects
- > Coordinate meetings with coworkers and clients to gather feedback for improvements to the product, communication, or gain inquiry for new services

### Service Solutions Inc.

Front-End Developer | UI/UX | Project Manager

July 2015 - October 2018

- > Evaluated client needs to develop, implement, and complete project plans
- > Maintained productive relationships with clients through frequent communication, allowing for expanded sales, improved products, and satisfied, recurring clients
- > Grew yearly department revenue more than \$150,000 in the first 18 months
- > Utilized time between projects to gain greater understanding of both business strategies, new technologies, and improvement of technical skills

## Education

### Code Louisville

Front-End Development, Python, and SQL

January 2019 - Present

- > Engaged in bootcamp dedicated to strengthening skills as a developer and data analyst
- > Bolstered skills in HTML, CSS, JS, Python, SQL through in-person and online classes, coding exercises, and building custom projects throughout the class
- > Utilized the skills learned to complete a personal website, as well as build towards a data analysis project, and gain familiarity with the Django development framework

### University of Kentucky

Communications, Bachelor of Arts

August 2012 - December 2014

- > Studied corporate, interpersonal, and digital communications at the University of Kentucky
- > Developed skills in researching and reporting on findings in various settings and topics
- > Gained valuable knowledge and experience in managing project quality and communication within diverse groups
